ADVANCED DETECTION.
[WHAT IS IT?]

SentinelOne™ uses patented threat identification and remediation functionality, to quickly protect desktops and servers for Windows, Mac and Linux.

FULL COVERAGE.
[WHY DO I NEED IT?]

Detect all known and unknown threats leveraging the latest behavioral-based technology with a single powerful agent regardless of where your endpoints are deployed - office, home and beyond.

CONTINUOUS SECURITY.
[CMIT PROTECTION]

An On-Demand Security Operations Center monitors and responds to threats protecting your most critical assets around the clock, allowing you to focus on your business and clients.

NEXT GENERATION ENDPOINT SECURITY BUILT FOR YOUR NEEDS.

ConnectWise endpoint security uses the patented SentinelOne™ platform for its unique malware detection and remediation technology. This solution incorporates the industry's most innovative endpoint threat detection, providing visibility into the root causes and origins of the threat, reversing the malicious operations and remediating them at an agile speed as needed.
