

Security Assessment

© CMIT Boston Cambridge

EVALUATE. [WHAT IS IT?]

A comprehensive review of both technical and non-technical security components (including compliance areas) of an organizations' IT structure and governance.

MANAGE. [WHY DO I NEED IT?]

An assessment is key to understanding potential technical and non-technical blind spots (e.g., unknown systems, lack of processes and policies for certain compliance areas.)

SECURE. [CMIT PROTECTION]

CMIT performs a variety of security assessments tailored to evaluate and protect their clients data by uncovering unknown areas of risk and developing a remediation plan.
